

**PROCEDURE FOR COMPLIANCE OF PUNJAB ECBC**

There will be three stages of approval i.e. Design stage, Construction stage and Completion stage along with supporting documents for compliance of Punjab ECBC.

The detailed process of approval of building plans will be done in following stages for the compliance of Punjab ECBC:

**1. Design Stage**

The applicant shall submit the clearance of PEDDA for provision of Punjab ECBC at design stage along with the application to the competent authority. For this purpose owner / architect shall submit certificate from ECBC expert / design professional along with required necessary documents for building permit for ECBC compliant building certificate at design stage (Form-A).

**2. Inspection during Construction Stage**

The Owner / Architect will submit a notice for inspection at constructions stage after construction of building envelope and get the clearance of PEDDA for approval at construction stage for further submission to the competent authority. For this purpose owner / architect shall submit certificate on inspection from ECBC expert / design professional along with required necessary documents for review of construction works for ECBC compliant building at inspection stage (Form-B).

**3. Completion Stage**

The owner / architect will again send the notice of completion of building for the clearance of PEDDA at completion stage. For this purpose owner / architect shall submit certificate from ECBC expert / design professional along with required necessary documents on completion of construction for ECBC compliant building certificate at completion stage (Form-C).

Note: The Form-A, B, C can be downloaded from PEDDA website:[www.peda.gov.in](http://www.peda.gov.in) for submission at the following address:
